

To: parents of 6th grade students entering 7th grade
Re: Immunization requirements for incoming 7th grade

The following immunizations are required for all incoming 7th grade students.

- If your student already had these vaccinations bring the clinic copy to the school nurse at Vogel in order to update your student records.

Tdap - Tetanus-diphtheria-pertussis vaccination

One dose is required instead of the 10-year booster. If your child has had a tetanus-containing vaccine in the past five years, the Tdap will not be required until after five years have passed.

Varicella (chicken pox)

Two doses are required. If your child has had the chicken pox disease this **vaccination is not required**, however you must notify the nurse at Vogel.

Meningococcal (MCV4)

One dose is required to protect from meningococcal meningitis.

Tdap - Vacuna contra el tétanos, la difteria y la tos ferina.

Se requiere una dosis en lugar del refuerzo de 10 años. Si su hijo/a le aplicaron una vacuna contra el tétanos en los últimos cinco años, no necesita la vacuna Tdap sino hasta que haya pasado cinco años.

Varicela

Se requieren dos dosis. Si su hijo/a ya tenido la varicela, no es necesario que le pongan la vacuna, sin embargo necesita notificar a la enfermera de Vogel.

Enfermedad Meningocócica (MCV4)

Se requiere una dosis como protección contra la meningitis meningocócica.
